

Health and Care Across the Lifecourse: HaCAL

Theme Focus

- Reflects categories used by members to deliver services
 - Ages and Life Stages
- Population Groups

Key Elements; Age and Life Stage related

- Pregnancy, Childbirth,
- Children and Families
- Transitions to Adolescence and Adulthood
- Work and Health
- Older Adults

Health and Care Challenges

- Frailty
- End of Life
- Living with Long-term Disability
- Marginalised Groups:
 - Homeless
 - Substance Misuse
 - Migrant Health incl. Asylum seekers

Overarching Aims

- Using member and academic resources with PAs and communities to co-develop a collaborative programme where life stages or challenges are the focus of interest
- Implementation with a focus on health inequalities
- Build Capacity, Partnerships and Networks regionally and further afield to:
 - Develop, Deliver and Implement evidence focused on different life-courses, stages and circumstances

National Cross-ARC Priorities - Aim

- To bring together NIHR ARCs with NIHR, AHSNs and others to catalyse implementation of service changes at a supra-regional and/or national level.
- Identify evidence-based solutions (e.g. interventions/service delivery models) that meet patient/system needs that are prime for implementation in the short-term, including working with stakeholders to identify and carry out any further research or evaluation work required to underpin this;
- Work with stakeholders to support implementation of interventions at a supra-regional and/or national level and undertake appropriate research and evaluation to support best approaches; and
- Develop proposals for further research to support national and/or supra-regional implementation in the national priority areas, including for further funding.

Today

- Discussion of outline proposals presented last time and subsequently prioritised
 - Brief presentation
 - Group work on tables
 - Storming, Norming and Forming to co-develop towards full proposals and draw together team membership
- Update on National Issues
 - National Priorities for Implementation
 - National themes
- PhD studentships
- New Outlines for presentation and discussion/prioritisation in small group tables
- CHI update- Prof Sarah Rodgers

National Cross-ARC Priorities

	1. Mental health	2. Adult social care and social work	3. Prevention, including behavioural risk factors	4. Multimorbidity	5. Health and care inequalities	6. Person-centred, integrated care	7. Healthy ageing	8. Children's health and maternity
